

Shedding Light on LED Bulbs

As the days get shorter, we need to rely more on lights—inside and out. However, that doesn't mean your energy bill should go up. One easy way to reduce the season's growing energy needs is to replace your incandescent light bulbs with more efficient ENERGY STAR® LED light bulbs. Here are a few reasons to make the switch:

- **More energy efficient.**
ENERGY STAR® LED bulbs use approximately 75 percent less energy than standard incandescent light bulbs.
- **Longer lasting.**
ENERGY STAR® LED light bulbs can last up to 10 times longer than incandescent bulbs, which means less burnt-out bulbs to replace.
- **High performing.**
ENERGY STAR® LED light bulbs perform consistently, regardless of temperature or humidity level.
- **Safer.**
ENERGY STAR® LED light bulbs produce very little heat and don't break like a traditional incandescent or fluorescent bulb.
- **Guaranteed.**
ENERGY STAR® LED light bulbs come with a minimum three-year warranty.
- **More options and features.**
ENERGY STAR® LED light bulbs are available with dimming on indoor models and automatic daylight shut-off and motion sensors on outdoor models.
- **More affordable.**
Many local retailers offer instant Hometown Energy Savers® rebates on qualifying ENERGY STAR® LED light bulbs! Visit lbwl.com/energysavers or call 800-573-3503 to learn more.

Our offices will be closed on Wednesday, November 11 for Veterans Day.

The BWL would like to say thank you to all veterans.

Our offices will be closed on Thursday, November 26 and Friday, November 27 for the Thanksgiving Holiday.

We wish you and yours a very Happy Thanksgiving.

Toys for Tots Lansing is collecting toys and taking donations online beginning October 1.

Go to lansing-mi.toysfortots.org for more information on collection sites or to make a donation.

Tune in November 20th from 6-8pm on: **FOX 47**

Control Systems: Set It and Forget It

Make controlling energy usage at your business automatic with control systems. Used on everything from HVAC systems to lighting and even computers, these controls ensure all of your business systems are operating as efficiently as possible. This saves energy and can even help protect the longevity of your equipment.

If you're interested in seeing how control systems can help your business, contact Hometown Energy Savers.® We can help you find a qualifying contractor and make the project more affordable with significant rebates. Visit lbwl.com/energysavers or call 877-NRG-LBWL (877-674-5295) to take control of your energy savings!
